

WMGLD Electric Projects – 2022

Updated 2/18/2022

1. Burns Substation Decommissioning

Work Schedule: All months 2022

Description: WMGLD will be decommissioning Burns substation. This will require underground cable work on Lake St, Albion St, Maple St, and Ballister St and overhead work on Albion St in the highlighted area. Cranes will be needed for removal of equipment at the substation.

2. New Circuit Construction – Downtown Wakefield

Work Schedule: Jan-September 2022

Description: WMGLD will be installing a new circuit to replace old circuits located in the downtown area. We will be doing underground cable work and conduit installation on Main St (south of Water St) and on West Water St. This will eliminate very old infrastructure and prepare for the future downtown improvement project.

3. Water St Circuit Improvement

Work Schedule: July-December 2022

Description: WMGLD will be extending a circuit from the East part of Water St to replace an old circuit in the highlighted area. Work will be done mostly in the overhead on Water St, Melvin St Ext., Delcarmine St and Spring Ave.
